	Urgent	Not Urgent
Important	Do - (Your MVP) • Define data parsing (Pandas) • Map out tax categories and rules • Set up testing data (CSV)	Schedule - (For V2.0+) • Build a categorization engine • Exporting a clean and concise output • Handle edge cases
Not Important	Delegate - (Use a library) • Generating mock data through AI • Formatting tables through tabulate or Pandas • Standardizing CSV header mapping across bank formats	Delete - (Cut it) • Rely on live API banking data • Create an entire GUI • Input other tax files (e.g. W2, W9, 1095-A)
